

iWL250

Powerful and Portable

OVERVIEW:

The iWL250 Wireless Terminal provides dependable 24/7 long-range wireless communication for portable payment processing. The powerful platform utilizes the latest technologies for powerful processing with a rapid printer (30 lines per second) and efficient mobile transaction speed. With integrated SIM card communication over the Rogers 3G Wireless network, the merchant can practically process transactions anywhere in Canada.

KEY BENEFITS:

- Wireless broadband connectivity (through Rogers 3G Cellular Network Data).
- Portability with GPRS wireless communication extending nationwide.
- Ideal for Pay-at-Door and Pay-at-Table.
- Supports multiple transaction types: Chip-and-PIN, signature-based Debit and Credit transactions with magnetic stripe, and Contactless cards (Tap & Go).
- Built-in thermal printer.
- Extra long lasting Lithium-Ion battery.
- Allows for entry of Gratuities of either a fixed amount or percentage of the invoice.
- High contrast backlit LCD display allows for clear vision.
- Approved EMV and PCI compliance.

BEST FOR:

- Delivery
- Taxi
- Kiosks
- Mobile businesses
